M-Planter M-160M...

- Is a one-headed mounding planter; mounds and plants the seedling, and hydraulically seals the seedling into the soil from two sides.
- Specially designed to be used with a harvester.
- Uses electrically piloted one-way auxiliary hydraulics of the base machine, with 170 bars pressure and 100 l/min flow.

M-160M specs	
Weight	1 000 kg
Width	1 000 mm
Height	1 600 mm
Depth	2 100 mm
Plantingtube \varnothing	60 mm*
Seedling capacity	160 seedlings

**Please note! The reload system can be customized to fit to different size seedlings!*

M-Planter M-160M standard equipment...

- Adjustable planting depth (120/150 mm) or customized
- Harvester coupler (U-coupler)
- Mounding claw

M-Planter M-160M optional equipment...

- Coupler tilt
- Fertilizer system
- Herbicide/insecticide/pesticide spray system
- Higher seedlingtubes
- Spade/rake (for more efficient harvesting residue sweep ability and additional soil preparation)
- Watering system
